Process Safety Chemical Inventory Report**Reporting Year**

The following chemicals have been identified as process safety materials maintained at your facility:

Tradename	Component	Max Allowed *	Est **	Max Daily Qty As %

** Note: Certain CAS numbers listed in the CFR 1910.119 List of Highly Hazardous Chemicals have multiple Threshold Quantities depending on the chemical state of the product. This report is based on the lowest threshold quantity for any CAS number.*

*** Note: If "Y" appears in the "Est" column, the percentage of mix for this component assumes the maximum possible percentage based on a valid range. It may be necessary to recalculate the quantity to exceed the Threshold after verifying the actual percentage with the manufacturer.*
